Art Unit: 1774

1. Upon reconsideration, the allowance of claim 6 is withdrawn for the reasons set forth below. Claims 3 and 4 remain allowed.

2. Claim 6 is rejected under 35 USC 112 (second paragraph) as being indefinite.

In particular, the claim recites a "second portion" (emphasis added) without reciting a "first portion" and recites "at a relatively faster rate" without reciting a slower rate for comparison. It appears that applicants have inadvertently omitted the step of "selectively cooling a first portion of the paper at a relatively slower rate to produce an uncolored portion" (see the amendment of June 20, 2001). Recitation of the aforementioned phrase would overcome this rejection.

3. The following rejection is predicated upon the assumption that claim 6 should recite the omitted sentence discussed in the preceding paragraph.

Claim 6 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one of ordinary skill in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. In particular, the recitations "selectively cooling a first portion of the paper at a relatively slower rate to produce an uncolored portion" and "selectively cooling a second portion of the paper at a relatively faster rate to produce a colored portion" constitute new matter. Applicants' assertion to the contrary, the disclosure at page 16, lines 18-23 of the specification fails to support the subject matter of claim 6.

4. The patent to Shibahashi et al. (GB 2135466A) is cited to show the state of the art of reversible heat-sensitive paper.

Art Unit: 1774

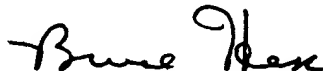

Example 2 teaches two cooling steps (see page 6, lines 26-28). In the first cooling step, the entire sheet is cooled at a slow rate. In the second cooling step, images are formed at a relatively faster rate with a cold pen. This patent has not been applied against the claims since the examiner is interpreting "selectively" to mean in a non-uniform manner and the "first portion" and the "second portion" to be distinct areas which are both less than the whole area.
